

# Chutes and Ladders

aka Snakes and Ladders

Also known as Snakes and Ladders, Chutes and Ladders is an easy game for children and/or parents to play together. All that's needed are the following:

- A dice
- A small game piece for each player  
*(This can be anything small. For example, a pen cap, an eraser, a coin etc.)*
- The Chutes and Ladders template (next page)  
*(The larger this can be printed out the better for playing.)*

How to play:

1. Have all players place their game piece on Start (square 1).
2. Each player takes a turn rolling the dice and moving their game piece forward according to the number rolled. If a player lands at the bottom of a ladder, they must climb it. If a player lands at the top of a chute, they must slide down it.
3. The first player to reach Finish (square 40) wins!

Have fun!
