

## Hand turkey

This popular children's activity for Thanksgiving is very easy to do! All you need are the following:

- 1 blank sheet of paper
- colored pencils or crayons
- 2 hands

Instructions:

1. Have the child place his/her non-dominant hand with fingers spread in the center of the blank sheet of paper.
2. Using his/her free hand and a black colored pencil or crayon, have the child trace an outline of his/her hand on the paper.  
(**note:** If this is difficult for the child to do, have someone else trace the child's hand for them or use the provided hand outline.)
3. Draw eyes, a beak and a wattle on the thumb (head) of the outline.
4. At the base of the hand outline draw two feet and in the center of the hand draw a wing.
5. Now you have a hand turkey that can be colored however the child wishes. Common colors for the fingers (feathers) includes: red, orange and yellow.

Have fun!
